

Minimum viable product

1. **TruRebel will be a network of independent/freelance artists, whom will have access to product database within the membership.**
2. Each member will have their own 'creative space' in which they have control of content or link to current space.
3. The front-end will be an open marketplace.
4. Payment information for members shall be logged in the back-end for simple ease transaction.
5. Background, the members will have control over a visible schedule that syncs with google calender and also allows front end users to 'schedule' open availabilities on calender.
6. Location 'hotspot' will be set by members via google maps, I.e territories

Rebel

- Submit Button ~ Selected surrounding circles{divs} will be initialized.
- Will be done first for debugging~

Tru ~ Tier 6

- Searching and adding Members

Clan ~ Tier 4

- Database of members

Messenger ~ Tier 1

- Both 'members' must be in same channel to initiate chat. Chat is not logged into database. 'members' will be searched by unique id"
- Most difficult in terms of knowledge required to implement~First step

Register ~ Tier 5

- Submission into database for review prior to acceptance. Proposal section included for 'show reel~demonstration' along with submission.

Link ~ Tier 3

†ruR£B£

- integrated schedule that links through google calender for registered members. Members can update their availability~schedule for others to see.

Sync ~ Tier 2

- fund transfer between 'members'
